ROLINE DisplayPort Cable with DP connection on both sides for connecting an Ultrabook, Notebook/Laptop or PC to a monitor, TV or projector - for screen transmissions in excellent quality with resolutions of up to 3840x2160 / 4096x2560 @60Hz!

- DisplayPort is a universal connection standard for the transmission of picture and sound signals. Applications include mainly the connection of monitors and televisions to computers, BluRay players and similar devices.
- The connector requires less space and is therefore more suitable for portable display devices (ultrabooks, notebooks/laptops) or for 2 connectors on a graphics card (on a slot plate).
- The practical plug design prevents the cable from slipping out of the DisplayPort socket.
- The robust nylon braid protects the DisplayPort cable effectively and sets it in scene visually.
- High-quality, double-shielded cable (foil+braid) with gold-plated contacts for optimum transmission of image signals
- Black metallic connector housing
- Compliant DP v1.2 (max. 4096 x 2560 @60Hz)
