ROLINE DisplayPort Cable with one DP and one Mini DP connection for connecting an Ultrabook, Notebook/Laptop or PC to a monitor, TV or projector - for screen transmissions in excellent quality with resolutions of up to 4K@60Hz!

- DisplayPort is a universal connection standard for the transmission of picture and sound signals. Applications include mainly the connection of monitors and televisions to computers, BluRay players and similar devices.
- The connector requires less space and is therefore more suitable for portable display devices (ultrabooks, notebooks/laptops) or for 2 connectors on a graphics card (on a slot plate).
- The practical plug design prevents the cable from slipping out of the DisplayPort socket.
- Mini DisplayPort connectors: Mini DisplayPort connector - DisplayPort connector; Mini DisplayPort is often used on monitors or graphics cards because it takes up less space than the conventional DisplayPort connector, despite having the same technology.
- Elastic and very flexible thanks to TPE outer sheath - best properties for cable ducts and similar applications where not much space is available
- Material: TPE (Thermoplastic Elastomer)
- Compliant DP v1.2 (max. 4096 x 2560 @60Hz)

ROLINE GREEN products are marked only with a paper tag and build with halogen-free TPE material, without plastic bags and without plastic cable straps for use in eco-friendly environments.
